#### 2 MANAGEMENT DISCUSSION AND ANALYSIS

## 2.1 Brief analysis of general operating performance during the period under review

(1) Brief analysis of general operating performance during the period under review

Despite the impact of reduced coal export price, the Company achieved stable growth in operating results through its constant operating strategies of increasing coal output and sales, and stabilizing export volume over the period under review.

During the period under review, the Company's revenue from principal operations was RMB2,156,976,000, which showed a decrease of RMB5,789,000 or 0.3%, as compared with the corresponding period last year, due mostly to the reduced average price for export coal. The cost of the Company's principal operation increased by RMB46,777,000 or 4.6% to RMB1,058,293,000, mainly resulting from the output growth. The Company's net profit reached RMB281,747,000, representing an increase of RMB24,092,000 or 9.4% over that of the same period last year.

As compared with the corresponding period last year, the Company recorded an increase of coal production by 0.98 million tonnes or 10.4% to 10.47 million tonnes, and an increase of sales volume for coal by 360,000 tonnes or 3.7% to 10.04 million tonnes for the period under review. Coal transported by the Railway Assets reached 6.92 million tonnes, which is comparable to that of the same period last year.

(2) Brief analysis of general operating performance during first three quarters

During first three quarters of this year, the Company's revenue from principal operations showed an increase of RMB641,721,000 or 10.8%, as compared with the corresponding period last year, to RMB6,584,856,000. Among the revenue, income from sales of coal increased to RMB6,466,504,000, up by RMB626,702,000 or 10.7%. Increase in sales volume of coal contributed to a rise of revenue from principal operations by RMB938,295,000. A drop in coal price, however, reduced the revenue by RMB311,593,000. Coal transported by the Railway Assets increased by RMB15,019,000 or 14.5% to RMB118,352,000.

The Company's cost of principal operations was RMB3,058,237,000, representing an increase of RMB474,106,000 or 18.3% over that of the same period last year. Cost of coal sold was RMB3,011,745,000, which has increased by RMB463,626,000 or 18.2% as compared with that of the same period last year. This was mainly due to an increase in sales volume and employees' wages. The unit cost of coal sold was RMB100.33/tonne, representing an increase of RMB1.8/tonne or 1.8% as compared with that of the same period in the previous year. This was mainly due to an increase in safety production investment and employees' wages. Cost of the services provided by the Railway Assets was RMB46,492,000, representing an increase of RMB10,480,000 or 29.1% as compared with that of the same period in the previous year.

As compared with first three quarters of last year, profit from principal operations increased by RMB151,860,000 or 4.6% to RMB3,441,530,000, net profit increased by RMB15,917,000 or 1.9% to RMB858,517,000 for the same period this year.

During first three quarters of this year, the Company recorded an increase of coal production by 3.53 million tonnes or 12.3% to 32.31 million tonnes, and an increase of sales volume for coal by 4.16 million tonnes or 16.1% to 30.02 million tonnes over the same period last year. Sales to the domestic market was 19.55 million tonnes, representing an increase of 4.56 million tonnes, representing a decrease of 0.41 million tonnes or 3.7% over that of the same period last year.

During first three quarters of this year, the Company's average coal price was RMB215.42/tonne, representing a decrease of RMB10.38/tonne or 4.6% as compared with that of the same period last year. The average domestic coal price was RMB192.41/tonne, representing a decrease of RMB2.00/tonne or 1.0% as compared with that of the same period last year. The average export coal price was RMB258.38/tonne, representing a decrease of RMB10.71/tonne or 4.0% as compared with that of the same period last year. The decrease in average coal price was principally due to: (1) the average contract price for export coal in 2003 was lower than that of the same period last year; and (2) sales of mixed coal and other types of coal with lower selling prices in domestic market increased substantially.

The following table sets out the Company's average coal prices during the first three quarters of this year:

		003	-	2002	Jnit: RMB/ tonne
	Third quarter	First three quarters	Third quarter	First three quarters	2002
Average coal sales price	210.90	215.42	219.97	225.80	225.63
Including: domestic sales export sales		192.41 258.38	193.90 255.05	194.41 269.09	194.78 269.53

During first three quarters of this year, coal transported by the Railway Assets reached 20.78 million tonnes, representing an increase of 0.78 million tonnes or 3.9%, as compared with that of the same period last year.

(3) Coal sales prices for the first three quarters calculated in accordance with the basis reflected in its previous periodical reports as announced overseas

As calculated in accordance with the basis reflected in its previous periodical reports as announced overseas, the average coal sales price for the first three quarters was RMB171.26/tonne, representing a decrease of RMB6.26/tonne or 3.5% over that of the same period last year. Average domestic sales price was RMB166.28/tonne, representing an increase of RMB0.47/tonne or 0.3% over that of the same period last year. Average export sales price was RMB180.56/tonne, representing a decrease of RMB13.10/tonne or 6.8% over that of the same period last year.

Average coal sales prices calculated in accordance with the basis reflected in its previous periodical reports as announced overseas:

The proportion of the profit from other operations in the total profit of the Company decreased from 3.79% to 1.96% as compared with the previous reported period. This was mainly due to a decrease in profit from the sales of materials.

The proportion of investment income in the total revenue of the Company increased from 0.17% to 1.41% as compared with the previous reported period. This was mainly due to an income from capital investment in shares of Shenneng received in the period under review.

During the period under review, no subsidy income was received.
